Empowering Entrepreneurs Everywhere

Women in Impact: Closing Women's Month with Power: Our first hosted workshop, Women in Impact, was a bold celebration to close off Women's Month. The event brought young women together to share experiences, challenges and ideas on how to drive change in their communities. It was not just a workshop but a stage for empowerment, inspiration and collective action. By starting here, we set the tone for everything that Impact Nexus stands for: inclusion, leadership and impact.

Thinking Differently with Design Thinking

We turned to Design Thinking, a creative process that helps youth solve real problems in new ways. Instead of just talking about challenges, participants learned to break them down, reframe them and design fresh solutions that actually work. The energy in the room was electric young people sketching, sharing and testing their ideas, proving that innovation starts with curiosity and teamwork.

The 6-Week Incubation Program

The 6-Week Youth Incubation Program, open to every young entrepreneur with a dream worth building. Over six weeks, participants dive into a journey of: Learning the basics of starting and running a sustainable venture. Building their ideas into strong business or project models with the help of mentors. Growing through networking, collaboration and real-world opportunities.

Leaders With Impact

At Impact Nexus, our leaders share a vision of equipping young innovators to build sustainable, funding-ready ventures. CEO Fulufhelo Mudavhi stresses preparing start-ups through masterclasses in business planning and design thinking, while Programs Director Sibongile Makena highlights co-creating with entrepreneurs, as seen in the Women In Impact event. Operations Director Unathi Mashaba believes lasting change comes from integrity, collaboration, and empowering others through patient, values-driven leadership.
